OFFICE NATIONAL DES HYDROCARBURES ET DES MINES

DG/ N° 0210/20

Rabat, le 24 Avril 2020

To
Mr José Maria Manin Quemada
Presidencia de la Comisión Nacional de Los Mercados y la Competencia

Reference: Public consultation for the new tariff methodology in Spain, in accordance with the European Commission Regulation n° 2017/460 of 16 march 2017 establishing a network code on harmonized transmission tariff structures for gas.

Object : Request for the inclusion on the tariff methodology and model of an exit point in Tarifa.

Dear Sir,

The Office National des Hydrocarbures et des Mines (ONHYM) is the owner of the Moroccan portion of the Europe Maghreb Pipeline (GME), connected to the Spanish gas transportation network at the maritime border landfalling close to Tarifa.

Referring to the public consultation process for the new tariff methodology in Spain, ONHYM, as a stakeholder, is kindly requesting CNMC for the inclusion, on the tariff methodology and model, of an exit point in Tarifa, to take into accounts flows (either backhaul or physical) towards Morocco trough the GME with the aim to get a bidirectional interconnection at this point.

Remaining attentive to any further useful advice,

Sincerely Yours,

Le Directeur Général

Amina BENKHADRA
